Wunder Flats Web App Bug Report

WUNDERFLATS

Abdul Wahab

1 Introduction

Purpose:

This report summarizes the progress of the current test phase testing carried on Wunder Flats web app project. It aims to identify the bugs as well as highlighting the key issues.

Comments:

There are several defects observed while testing wunderFlats web app, following are the defect list.

Defect Highlights:

Defect 1: Special Character should not be allowed in First and Last Name

Defect 2: Design is breaking (Text over flow) for user having long name (Character limit should be define)

Defect 3: Blank Space in first and last name shows proper validation text

Defect 4: German and English Language "Birth date" format is totally changed

Defect 5: Future dates are accepted in the "Birth date" field. Eg: (Greater than current date)

Defect 6: Birth date format is changed when user update language to German

Defect 7: Date of birth greater then Leap year should not be allowed

Defect 8: During Automation there is some "Authentication Required Error"

Defect 1: Special Character should not be allowed in First and Last Name

Details:

- ❖ Type: Defect
- ❖ Priority: ⬆ 1- Critical
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: OPEN

Description:

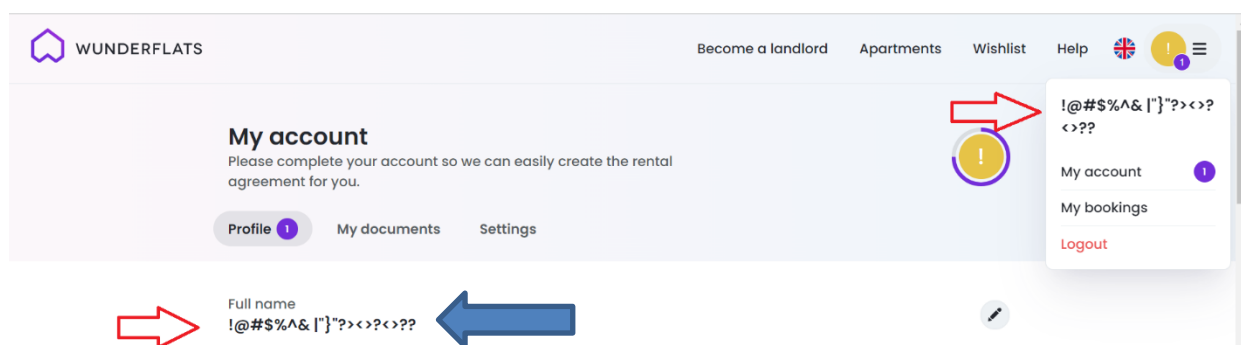

Actual: User is able to add special character for first and last name

Expected: User should not be able to add Special character and user should be able to view proper validation appear as 'First name and last must not contain numbers or special characters'

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Open the profile page
3. Add special character for first and last name and click on save button

Screen Shot :

Defect 2: Design is breaking (Text overflow) for user having long name (Character limit should be define)

Details:

- ❖ Type: Defect
- ❖ Priority: ⬆ 2- Critical
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: OPEN

Description:

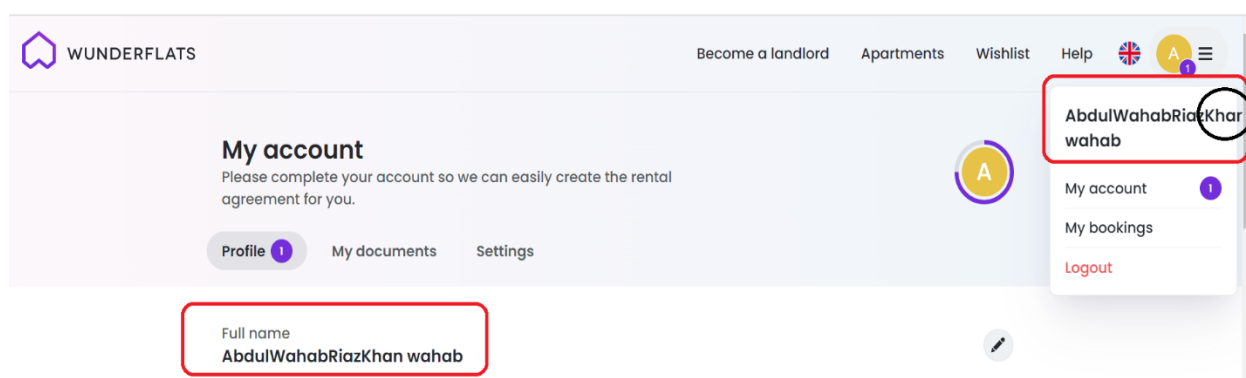

Actual: When user has long first and last name then user is able to view design break(text overflow) under the menu button of the header

Expected: Character limits should be implemented for the user first and last name

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Open the profile page
3. Add long first and last name and click on save button
4. Click in menu button in the profile header
- 5.

Defect 3: Blank Space in first , last name and email shows proper validation text

Details:

- ❖ Type: Defect
- ❖ Priority: 3 - Medium
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: OPEN

Description:

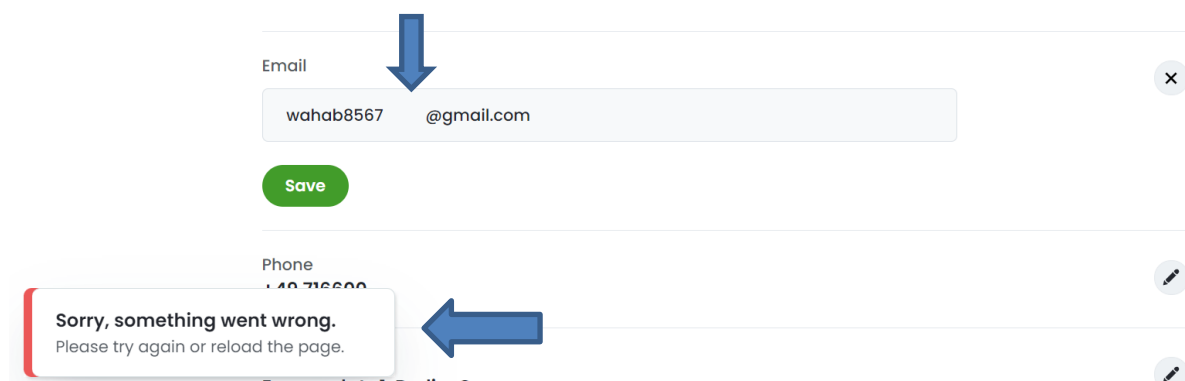

Actual: When user add black spaces in first name, email and click on save button then user is able to view toaster having text 'Sorry, something went wrong. Please try again or reload the page'. This Toaster text is confusing as user perspective

Expected: User should be able to view the proper validation text when user add blank spaces. The validation text should be like 'The value is required'

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Open the profile page
3. Add space in first,last name email and click on save button

Screenshot:

Defect 4: German and English Language "Birth date" format is totally changed

Details:

- ❖ Type: **Defect**
- ❖ Priority: **3 - Medium**
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: **OPEN**

Description:

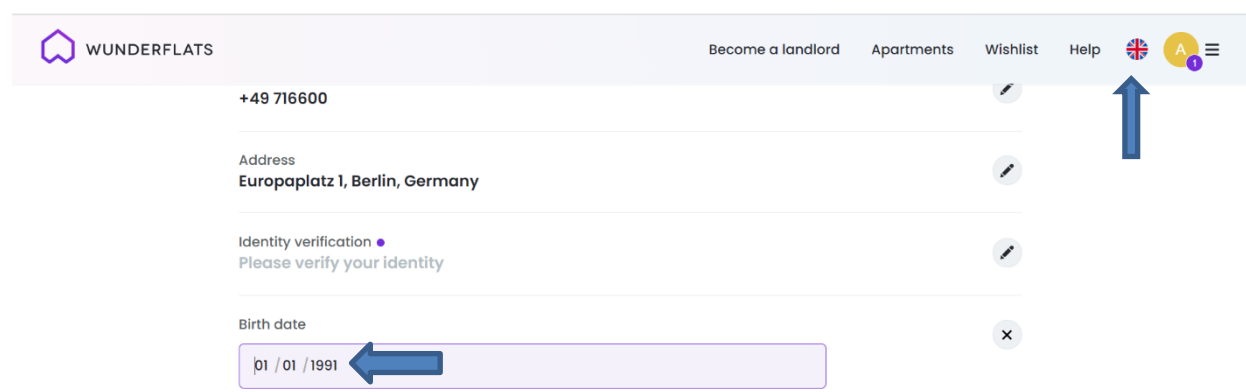

Actual: User is able to view slash as separator in the birth date when the language of web app is English. When user changed to German language then user the birth date separator change to dot

Expected: User should be able to view same separator for birth in German and English both languages

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Open the profile page
3. View the birth date separator
4. Change the language
5. Again view separator

Defect 5: Future dates are accepted in the "Birth date" field. E.g.: (Greater than current date)

Details:

- ❖ Type: Defect
- ❖ Priority: 🔼 1 - Critical
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: OPEN

Description:

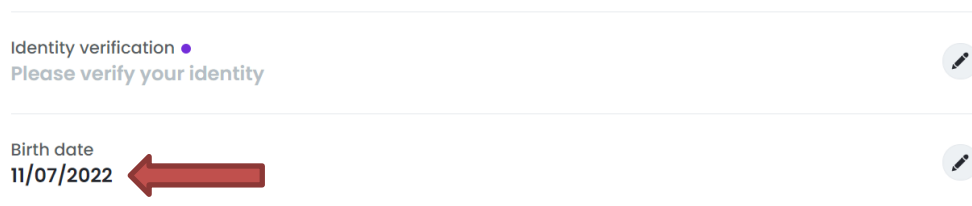

Actual: User should be able to add birth date greater than current date(Today)

Expected: User should not able to add the birth date greater then current date
(Future dates are not accepted)

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Open the profile page
3. Edit the birth date and today or next coming week date
4. Click on save button

Screenshot:

The screenshot shows a user profile page with two main sections. The top section is titled "Identity verification" with a purple dot and the text "Please verify your identity". The bottom section is titled "Birth date" and shows the date "11/07/2022". A large red arrow points to the date, indicating the focus of the defect. Both sections have a circular edit icon on the right.

Identity verification ● Please verify your identity	
Birth date 11/07/2022	

Defect 6: User is able to add Date of birth greater then Leap year

Details:

- ❖ Type: Defect
- ❖ Priority: 3 - Medium
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: OPEN

Description:

Actual: User is able to add the date 30.02.2020 (we have no 30th Feb), when user click on save button then user is able to view the added birth date for next date IE : (First March)

Expected: User should not be able to add the birth date greater than leap year

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Open the profile page
3. Edit the birth date and add date 30.2.2020(Leap year)
4. Click on save button

Screenshot: Before click on save button

Defect 7: As software tester when we write automation script for empty phone number validating then my cypress runner did not allowed me and shows some **Authentication required error**.

Details:

- ❖ Type: **Defect**
- ❖ Priority: **3 - Medium**
- ❖ Affect Version: v1.1
- ❖ Environment: Test
- ❖ Product: WunderFlats
- ❖ Status: **OPEN**

Description:

Actual: When tester write automation script for the validation of empty/null phone number then in cypress runner tester is able to view toast which shows 'Something is wrong'

Expected: When automation script run then proper validation should be shown and test will be passed

How to Reproduce or test:

1. Login to WunderFlats web app.
2. Tester to run automation code for phone number
3. Click on save button
4. Tester is able to view the Error

Note: As s software automation tester I tried many ways to find out the solution of this issue. As far as I know some authentication issue. I also try my best to user cypress before each function and store session id and token in the test.

But the end I face same issue. In the real web app updated of phone number is perfectly fine but when we run automation script for phone number validation then its fails. May b there is some issue about API which is not trigger in the cypress runner
